Please Read Carefully Before Ordering

ORDER EARLY—It avoids disappointment by eliminating the chance of the variety selected being sold out. However, we do not discriminate, our prices are the same in the spring as in the fall. Our stock is always guaranteed, early or late, our large storage facilities permit this.

GUARANTEE—We ship only first quality stock which grows easily. It is clean, insect pest and disease free, healthy and true to name. Every bulb is fully guaranteed as such. Should any prove otherwise, we will gladly replace or refund your original purchase price

SUBSTITUTION—We do not substitute unless directed to do so. However, a second choice is advisable if late in the season.

SIZE—Our bulb sizes are standard and liberal. No. 1—1½ inch and over; No. 2—1¼-1½ inches; No. 3—1-1¼ inches; No. 4—¾-1 inch; No. 5—½-¾ inch; No. 6—¼-½ inch.

Large—1¼ inches or more in diameter (Nos. 1 and 2).

Medium—¾ to 1¼ inches in diameter (Nos. 3 and 4).

Small—¼ to ¾ inch in diameter (Nos. 5 and 6).

QUANTITY—3 bulbs will be sold at the 10 rate; 25 at the 100 rate; 250 at the 1,000 rate.

SHIPMENTS—Weather conditions govern this largely. They usually start about March 15th. Unless otherwise directed.

DELIVERY—All orders amounting to \$1.00 or more will be delivered free to all parts reached by Parcel Post. Orders amounting to less than \$1.00 will add 15c for postage.

TERMS—Remittances should accompany your order, and should be made by check bank draft, American Express or Postal money order.

REFERENCE—For our standing, you may refer to:
The McDowell National Bank of Sharon, Pa.

PRICES—having a number prefix, as **2-.05**, means **2 for 5 cents**.
Prices as given in this catalog supersede all previous quotations.

SERVICE—As we are one of the largest producers of gladiolus, we offer the best, with courtesy, being fully appreciative of your patronage.

BEST FLOWERS—An exhibitor insists on a young bulb 1¼" or more in diameter. Bulbs over two years old usually do not produce the maximum of flower, and frequently are a source of trouble from disease.

BULB PERFORMANCE—For the maximum performance or exhibition spikes—**Large** (over 1¼") are much to be preferred. **Medium** (¾" to 1¼") bulbs are of blooming size but the flower is not as large and requiring more time to bloom. **Small** (¼" to ¾") bulbs will at times bloom late in the season and are noticeably smaller in size; **Bulblets** cannot be depended upon, either to bloom or for germination, many fail to grow under the very best of conditions.

"Your Assurance of Beautiful Flowers"

Our gladiolus bulbs are the best it is possible to produce. They are well grown, without pampering or irrigation, are scientifically harvested, cleaned and stored. They receive final inspection and preparation before delivery to you. They reflect this culture and care by giving you their beautiful bloom, the kind of bloom all flower lovers are looking for. Be sure to give them a trial—this season.

STEWART INTRODUCTIONS FOR 1940

The public has been waiting a long time for a blue gladiolus which is healthy and which possesses good growing habits. Many originations have been forthcoming but it seems that every blue gladiolus available today is not quite up to par in vigor with gladiolus of the more popular colors, such as red or pink.

At last we have found one of our blue seedlings which possesses all these fine qualities. A blue which is as robust as any gladiolus you can name, regardless of color. We have chosen to name our introduction:

Blue Heaven

Blue Heaven is medium to light blue. It carries a double row of good sized florets, holding eight to ten open at one time, even in extreme heat. The foliage is healthy, the bulbs are round, plump, and clean, and the bulblets germinate readily. Here is a blue gladiolus which can be grown by all flower lovers, not just by the connoisseur. It will respond to average care and culture and will produce just as healthy and beautiful a bloom as any other gladiolus in your garden.

BLUE HEAVEN PRICES—Any size Bulb \$10.00 each; Bulblets \$1.00 each.

Jack Frost

Here we offer a pure white sport of Phyllis McQuiston. This variety, Stewart's White, has all the excellent characteristics which one would expect, it being a sport of Phyllis McQuiston.

As a cut flower white it is unequalled. It opens six or eight large florets at one time on a tall, strong, always erect spike of twenty or more buds. The stock is clean and healthy and the bulblets germinate readily. Blooms open well from shipment, and for these reasons we predict that it will be one of the leading white commercials in a very short time. Even now it has been accepted locally by the florists as one of the finest cut flower whites they have ever used.

JACK FROST PRICES—Any size Bulb \$10.00 each; Bulblets \$1.00 each.

Del Rio

Here we offer a variety which has attracted much attention from the visitors to our seedling gardens, probably because of the A-1 placement of its double row of large flowers. It opens easily six or more at one time on an always tall, strong spike of twenty or more buds. The flowers are a smooth cream, slightly ruffled, blending to a deeper, rich cream throat. Its growing habits are excellent and the bulblets germinate readily. Our only regret is that the stock is not yet plentiful enough for us to use it as a commercial. Surely when it is better known, and the stock increase is sufficient, it will be one of our leading commercial cut flowers in the cream colored class.

DEL RIO PRICES—Any size bulb \$10.00 each; Bulblets \$1.00 each.

OUR 1939 INTRODUCTIONS

Mrs. K. T. Keller

This flower is much larger than any of the yellows, and of the wide open type. It is an exquisite shade of perfectly clean, soft yellow, blending to a deeper throat without any markings whatsoever, giving the entire flower a depth and richness enhancing the beauty of this stately variety. There are six or more of these large flowers open at one time on a tall, strong spike of twenty buds. The plant is very vigorous, a real improvement in the yellows.

MRS. K. T. KELLER PRICES—Large Bulbs, 1-\$4.00; 10-\$32.00; Med., 1-\$3.00; 10-\$24.00; Small, 1-\$2.00; 10-\$16.00; Bulblets, 1-\$.40; 3-\$1.00.

Eileen Friedell

The florets are a perfectly clear soft white, a touch of refinement being given by an equally soft, ruby throat. The entire flower has this outstanding smoothness and richness of color, giving unusual distinction to this gorgeous flower. The plant is vigorous and strong. The tall, erect spikes of eighteen or more buds hold easily five florets open at one time.

EILEEN FRIEDEL PRICES—Large Bulbs, 1-\$4.00; 10-\$32.00; Med., 1-\$3.00; 10-\$24.00; Small, 1-\$2.00; 10-\$16.00; Bulblets, 1-\$.40; 3-\$1.00.

Mrs. Julia P. Buhl

Something very different and unusual. A large flower on a tall, heavy growing plant that is vigorous. Something new in the violet color class. The large flower is rich violet with a blue cast at the outer edges of the petals, and blends gradually to a soft cream throat, which is overlaid with a delicate blue violet feather. It will hold four or more open at one time, and is very well liked wherever shown.

It was my privilege last year to name this flower for one who loved and has given so liberally for the children of Sharon, Pa. Her philanthropic work will ever be on the tongues of Sharonites. A real lover of flowers, which was so freely expressed on her numerous visits to our gardens.

MRS. JULIA P. BUHL PRICES—Large Bulbs, 1-\$4.00; 10-\$32.00; Med., 1-\$3.00; 10-\$24.00; Small, 1-\$2.00; 10-\$16.00; Bulblets, 1-\$.40; 3-\$1.00.

Acona

A very valuable early cut flower variety. This clear cream is ruffled, holding five or more open. The flowers are medium in size and the spike is better than medium length. A good strong grower, always erect and straight; a good producer. Coming as it does, well before the others in its color range, it is always in demand. A really profitable variety for the commercial grower, and the best early cream for the home garden.

ACONA PRICES—Large Bulbs, 1-\$1.00; 10-\$8.00; Med., 1-\$.60; 10-\$4.80; Small, 1-\$.40; 10-\$3.00; Bulblets, 1-\$.10; 12-\$1.00.

1938 INTRODUCTIONS

Mrs. Walter P. Chrysler

(Illustration page 8)

This flower is distinctly different, with its curls and ruffles. We have seen nothing to compare to the individuality this flower possesses. Four or more of these light rose pink flowers are open at one time, blending nicely to a bright throat; a pronounced deep rose line marks the center of each petal. The variety will soon be grown by all lovers of gladiolus, it being most desirable as a cut flower, possessing the best of substance. A free producer.

PRICES—See page 20.

Andree Clark

(Illustration Front Cover)

This variety was awarded a blue ribbon when shown as a seedling. The flowers are a perfectly clear, light rose pink, without markings, occasionally a slight overlay. The spikes are tall and upright, carrying six or more of these lovely large flowers open at one time. It is certain to become a very popular and lasting variety with its strong habits of growth and ease of production.

PRICES—See page 13

La Grace

Here we have charm. A medium size flower of exquisite light La France pink with vivid thumb nail throat marks of bright pink; delicately ruffled; all combining to enhance the sweetness of this refined variety. Several of these flowers open at one time on a tall, slender, erect spike. A very popular variety.

PRICES—See Page 18.

Persian Orange

(Illustration page 8)

The very finest of the oranges. A smooth, bright, true Persian Orange. A shade that is new. The excellent height and straightness of its spike, along with the clear, sharp median lines add to the chicness of this variety, making it one of our very best. The flowers are of good size and hold easily six or more open at one time. An excellent producer.

PRICES—See Page 21.

Valentine

All that the name implies—a real beauty in a bright, clear red with large white throat. A strong, vigorous grower, it holds eight or more open at one time, well placed on an always straight, tall spike. A most striking flower, well liked by all.

PRICES—See Page 22.

Flash

(Hedgecock)

The color quality in this flower exceeds that of any scarlet I know. It is rich and beautiful, a decided advance in this class. A vigorous, healthy grower of tall, strong spikes, always erect, carrying five or more flowers open. An excellent cut flower variety, and in demand locally as a commercial.

PRICES—See Page 16.

1938 INTRODUCTIONS

Mary Damaris

(Illustration page 28)

This is by far the most beautiful shade of soft yellow I have ever seen in gladiolus, perfectly clear with white stamens. The placement is ideal and holds seven or more large flowers open at one time. It consistently produces 40-inch spikes even from small bulbs that are always erect and strong. A free and vigorous growing variety, a good producer. This variety repeatedly wins in its color class wherever shown. The illustration on page 3 was made from a photo of the three winning spikes at the big Boston Show 1938, where it had previously won.

Mary Mamaris is the most satisfactory cut flower and exhibition yellow today. PRICES—See Page 19.

MARY DAMARIS as it is grown and artistically arranged
in England by Major Churcher.

Lindsay

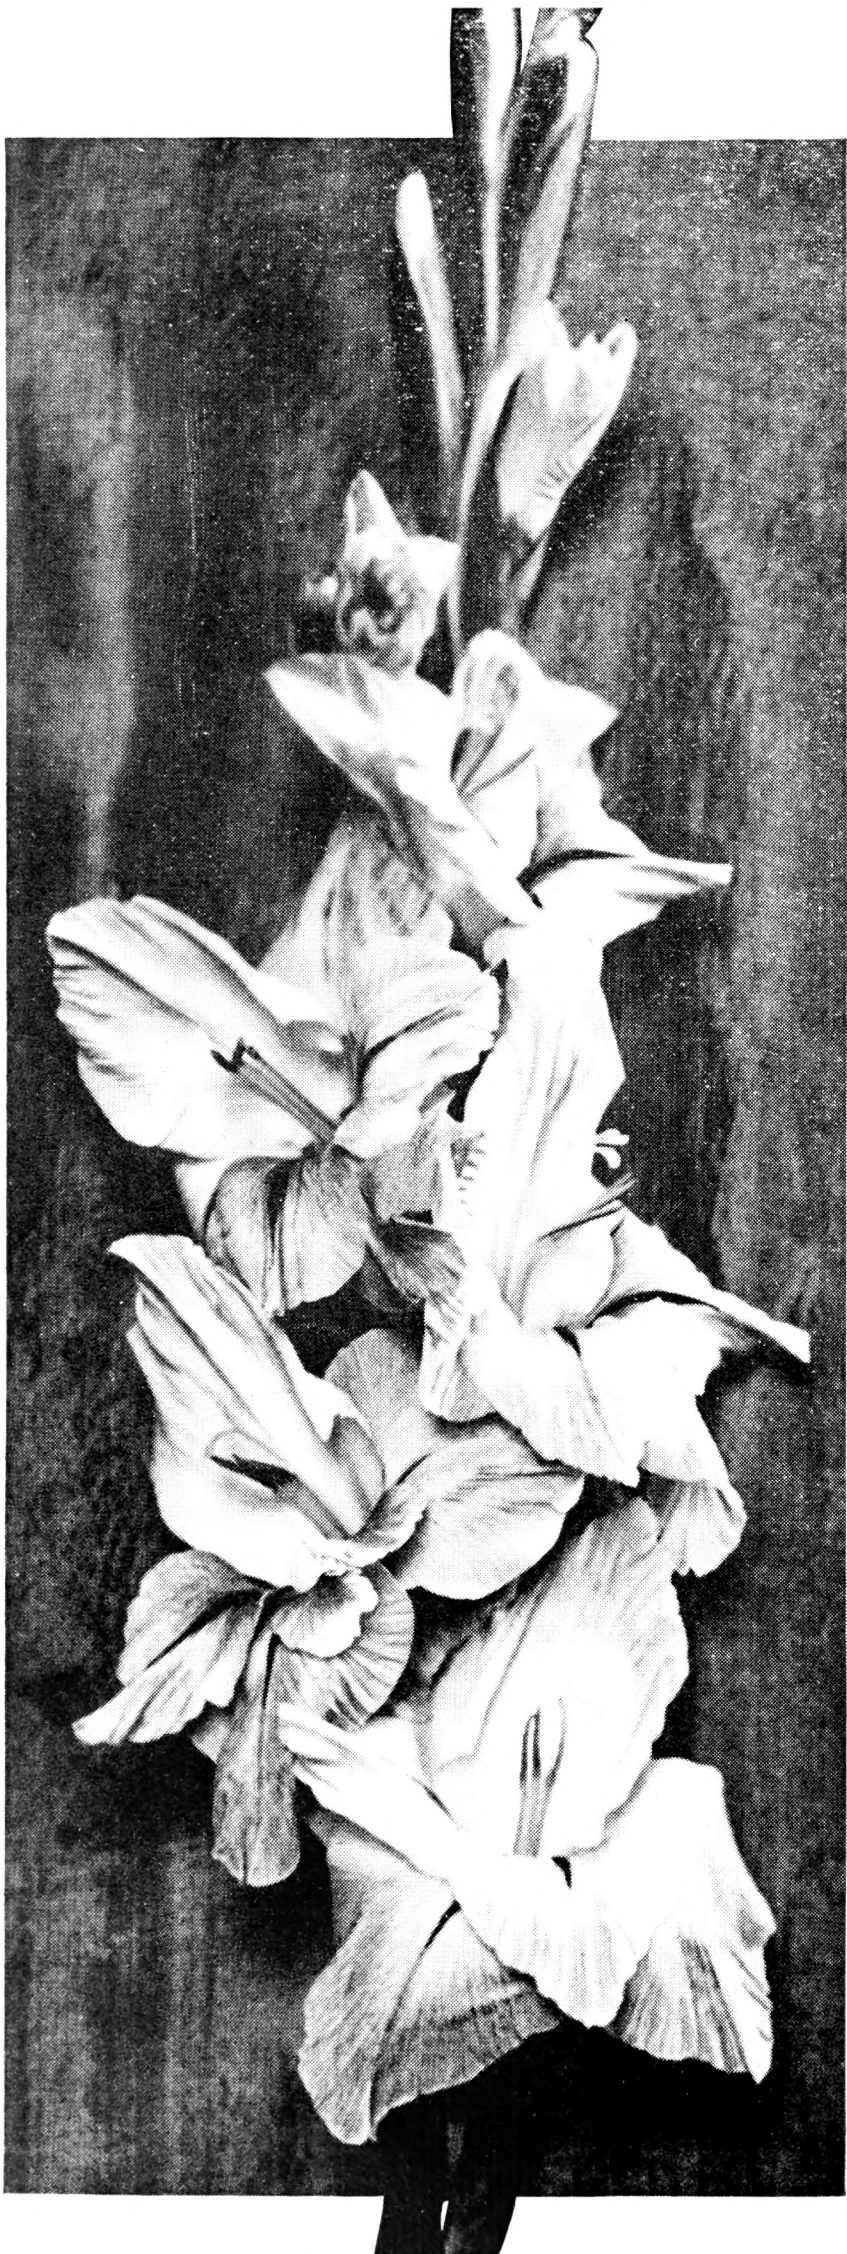

(Patterson)

This variety has proven itself many times as being superior to all in its color class. It repeatedly wins in the Canadian Gladiolus Society shows. The color is buff-orange, with eight or more large flowers open at a time with 18 or more buds. The spike is tall, erect and holds the perfectly placed flowers easily.

It is an excellent cut flower, possessing more than ordinary ability to withstand the warm days.

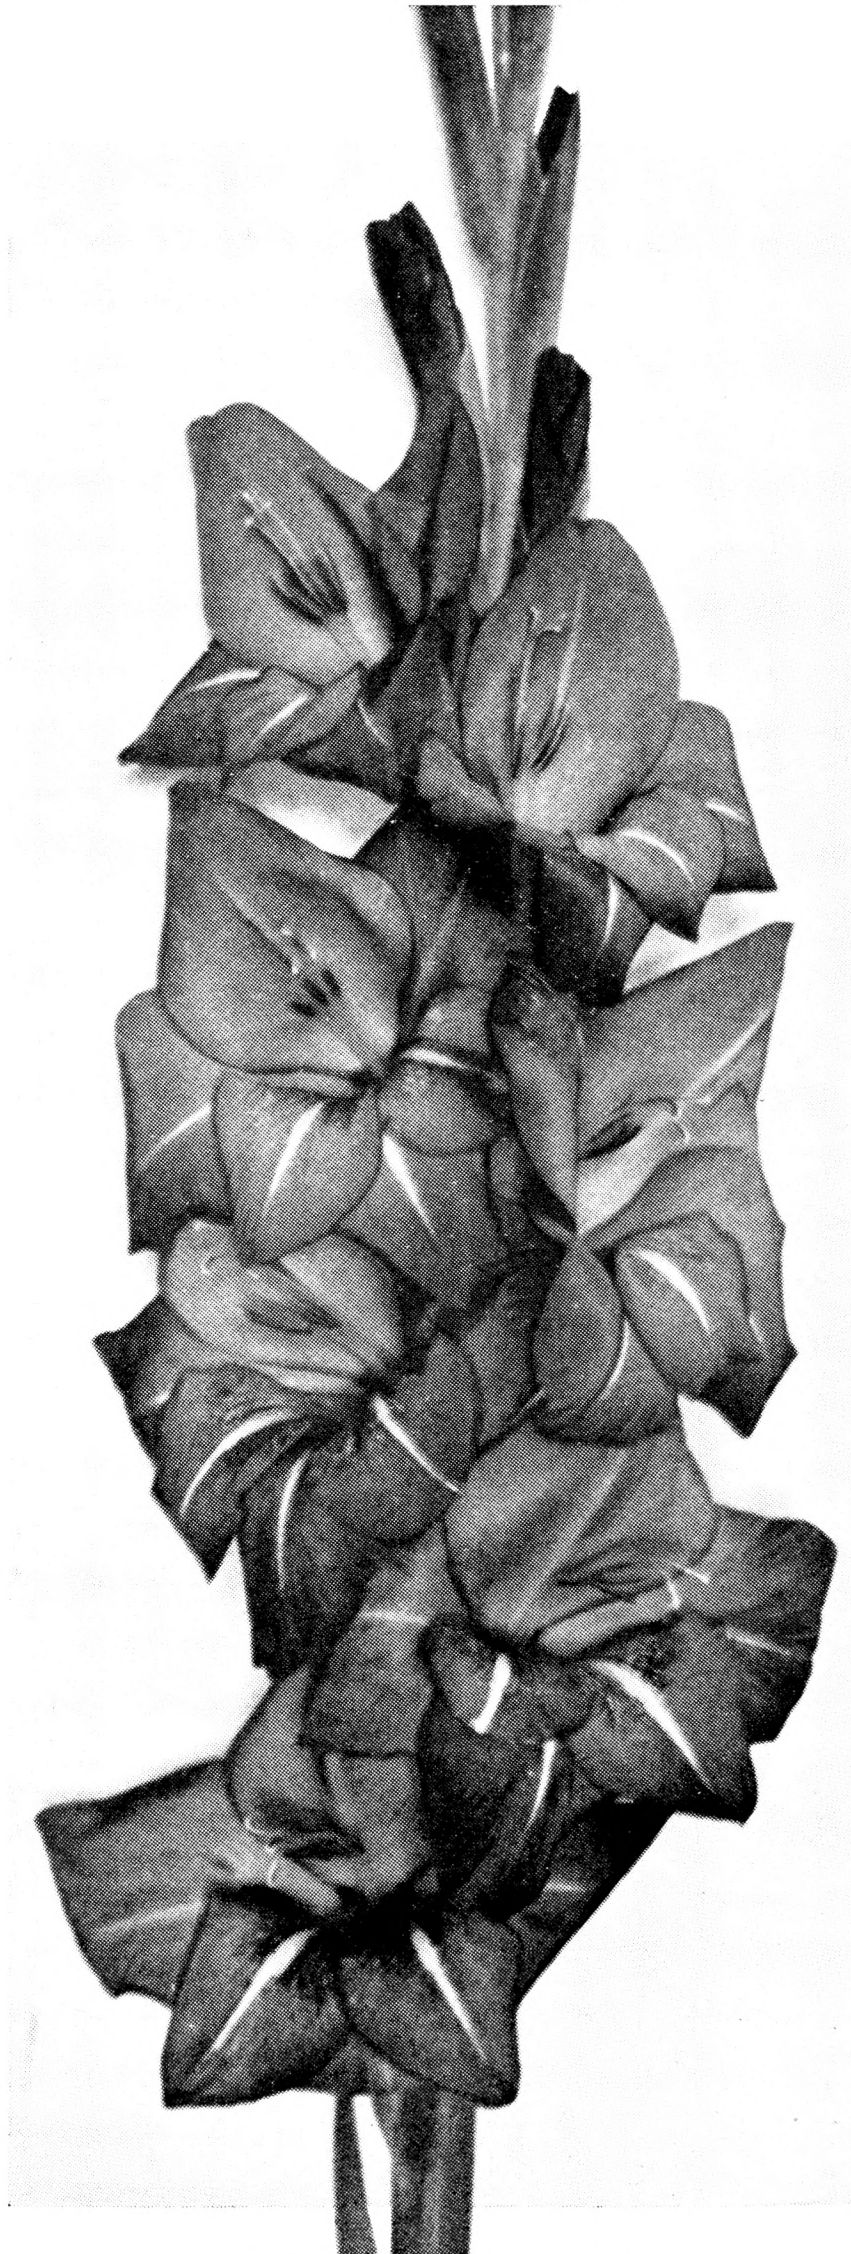

PRICES—See Page 19.

Mrs. Walter P. Chrysler

PRICES—See page 20

Persian Orange

PRICES—See page 21

EARLIER INTRODUCTIONS

Alfred M. Landon

Coming as it does well before the rush of summer bloom, makes this a much sought after flower by the florist. We are still unable to meet the demand for it. This variety with "Village Queen," and "Jessica" make a trio of top price early cut flowers that are welcomed by the florists both wholesale and retail. They make a grand showing for the home before others arrive.

"Landon" is a smooth, soft scarlet flower of good size with 8 or more open on a really tall tough spike that is always erect. A vigorous grower and good producer.

This variety is always in demand so get your start early.

PRICES—See Page 13.

Alice Herriott

The warmth of this beauty with its blending of rich cherry-rose with just a cast of blue to the upper throat make it one of the most beautiful flowers we have. A tall, strong spike with eight of these beauties open at one time makes a truly impressive picture. A flower you will like in your garden.

PRICES—See Page 13.

Blue Bizarre

A real novelty, and the recipient of many favorable comments wherever shown. It has unusual color, being a light violet blue with varying overlays of deeper violet blues, some of the flowers being comparatively clear. Flowers better than medium in size on a nice strong spike make it a really desirable addition to the garden. It is used a great deal as a cut flower, too.

PRICES—See page 14.

Success

(Illustration page 28)

This perfectly pure white is positively the most arresting variety we have grown. We shipped our flowers to the big Boston show by express (650 miles). There were three newer varieties of white in our display—"Success" was the one singled out every time. They withstood the abuse of the shipment, opened perfectly throughout the show.

Tall, strong, stately, pure white. Very large flowers and five or more open at a time.

Smaller quantities were shipped even greater distances, placed on the tables in competition with their local grown varieties, and still won. The future of this variety is extremely bright.

PRICES—See Page 22.

Precious

A dainty flower of smooth cameo pink, heavily ruffled and lacinated. Perfect for table decoration. It grows about thirty inches tall, blooms perfectly from medium sized bulbs and is quite prolific.

PRICES—See Page 21.

EARLIER INTRODUCTIONS

Totem

We have never grown a variety that produced better spikes than this one, and the placement is never faulty. It opens perfectly from shipment, and stands up perfectly on the hottest August days.

The flowers are large and round with five of them open in perfect placement on a tall erect spike. An outstanding variety in the garden.

The color is correct as a cut flower—A brilliant salmon scarlet. This variety always brings top prices. It is a perfect shipper, opening well expanded flowers. We have reports from Florida, Mississippi, and New England, that it is the best, by far, in its color class that they have ever grown. Here we offer a tried and true cut flower variety.

PRICES—See Page 22.

Margaret Stewart

One of our most popular varieties, and a real beauty. Not a glamorous but a rich and beautiful red-red rose in color, a shade not to be found in others. With the very best of growing habits it consistently produces tall straight spikes, holding five or more good sized flowers open at a time. A grand variety for your home garden. Then, too, the florists use it freely which indicates its correct shade of rose-red.

PRICES—See Page 19.

Village Queen

This variety is making quite a name for itself. Many growers, as well as several local florists, have chosen it as one of the very best early commercials we have. An excellent cut flower, this variety is truly an asset to everyone's garden. It produces tall strong spikes of eighteen or more buds carrying easily five extra large flowers open at one time.

It has also proven itself earliest in the greenhouse over all other popular varieties grown for that purpose. Truly a valuable commercial worthy of your trial.

PRICES—See Page 23.

Maj. Edward Bowes

(Illus. page 11)

This is a massive plant, tall heavy spikes that carry the long flower spike perfectly. It is not unusual to have more than twenty buds to the spike, and it easily holds eight or more flowers open at a time.

The flowers are large, a bittersweet pink with occasional overlay of a slightly deeper tone. The small neat pinard yellow throat adds much to the attractiveness of this outstanding variety. An excellent exhibition variety, with wonderful substance.

I fully expect the "Major" to become one of our most popular varieties. It already has a big start in that direction.

PRICES—See Page 19.

Phyllis McQuiston

(Illustration page 11)

The gorgeous pure pink that blends perfectly to a soft light throat.

Last year more than ever before it proved itself **the most popular of all pure pinks**. It grows freely gives tall, strong spikes that are always straight. It carries eighteen or more buds and holds easily five open at one time.

This variety has not arrived at its present enviable position among growers of gladiolus, both amateur and commercial overnight. It has by its own performance proven itself unequalled. For this reason it will be grown for many years to come and in ever greater quantities. Last year as usual we enjoyed a complete sellout.

"Phyllis" was our first introduction. It has been and will be a profitable variety to grow so join us and get your start now.

PRICES—See Page 21.

Phyllis McQuiston
(Stewart)

PRICES—See page 21

Major Edward Bowes
(Stewart)

PRICES—See page 19

EARLIER INTRODUCTIONS

Colfax

This is a truly beautiful shade of velvety rich deep violet, the flowers are better than medium in size, and have exceptionally heavy texture. There are four or more open on a nice strong spike, and always straight.

The spike is better than medium tall, and well proportioned with 16 or more buds well spaced. This variety has not sold as fast as most of mine as it has not been shown as frequently. It is nevertheless a glorious shade of violet and will go just as soon as it is better distributed.

PRICES—See Page 14.

Elsie Adele

(Illustration page 3)

A perfectly smooth, and clear blue La France pink, a dignified refined beauty. The spikes are tall, and rigid, with five or more large flowers open at one time, with 16 and more buds to the spike. This too is a “second early,” and a very valuable cut flower judging from testimonial letters.

PRICES—See Page 15.

Elite

The flowers are a brilliant salmon pink, running to peach red with a very snappy Neapolitan throat. It produces tall, strong spikes with a double row of flowers, carrying six or more open at one time. This variety is particularly attractive when grouped in a bouquet, or in floral sprays. Grows vigorously and bulblets germinate readily.

PRICES—See Page 15.

Jessica Dragonette

(Illustration page 3)

This flower is an exquisite perfectly clear rose pink, blending to a lighter throat. The entire flower which is of better than medium size has a blue sheen, giving it real beauty. A vigorous growing variety of good height with four or more flowers open. A good producer, and much to be desired as an early cut flower.

PRICES—See Page 18.

Euclid

The flowers are a large wide open white, blushed light pink at edges, with a touch of soft cream in the throat. It holds five or more florets open at one time on a tall, strong spike. This variety has proven popular, in that we have been sold out of large bulbs on this variety for the past several years. If you have not already tried this one, be sure to include it with your order this year, as it is truly an asset to anyone's garden.

PRICES—See Page 16.

STEWART SELECT GLADIOLUS

We thank you for your enthusiastic acceptance of our selections in the past, and assure you the varieties offered in this catalog are again the very finest obtainable from every source. TRY THEM, permit them to GLORIFY YOUR GARDEN THIS YEAR.

Originators names immediately follow (in parenthesis) the name of their variety. Some are abbreviated, from Scotland—Mair; France—LeMoine; Holland—Grullemans, Velthuys, and Pfitzer, (PF.); Australia—Erry, Rides, Symons, Gilrey, Phillips, Swenson, Fallu & Ball; New Zealand—Donney, Julyan, Burns & Whitely, and from Canada—Crow, Palmer & Groff. In the United States—Kunderd, (K3; Diener, (D), and all others named.

CARE AND CULTURE

THE GLADIOLUS can be successfully grown in practically any soil. They are easily grown and respond wonderfully to a little attention, such as timely watering and cultivation. They will adapt themselves to most any garden and will be found doing much better than most flowers with an equal amount of effort by the grower, be he amateur or professional.

THE PACKAGE when received should be opened at once to admit air directly on bulbs—store in cool, dry and frost-proof place until planting time.

SOIL and LOCATION—Any good garden soil is very satisfactory; the soil should not be worked when wet, and should be kept pliable at all times during the growing season. They will not do their best in too much shade. They enjoy being planted in rows or in beds; they are valuable in the landscape, putting clumps of all one color or mixed at suitable points for the desired effect. The ground should be well drained for best results.

DISINFECTING—Precautionary measures guarding against insect pests and bulb troubles are very effective and most economical. The garden should be cleaned and the old tops of gladiolus as well as the tops of other plants and other refuse should be raked up and burned. The storage room should be clean and disinfected as well as the bulb containers before using them to store bulbs over winter. Disinfecting all bulbs before planting is an easy task and is advisable as it will practically eliminate any disease or insect pest. We offer but one method: this accomplishes all in one operation; use at the rate of one ounce of Bichloride of Mercury (poison) to 7 gallons water (B. of M. is more soluble in warm water). soak from 8 to 10 hours, the night before planting, (not necessary to remove husks); a simple procedure is to place bulbs in salt or sugar bags, tie strong string around top of bag, other end of string carrying the variety name on it, drop in solution, a stick will punch them under—after soaking, hang up by string to dry, or they may be planted wet. Use non-metallic container for the B. of M.

PLANTING—Have soil loose; make trench or hole deep enough so that bulbs can be covered with three inches of dirt, (sandy soil, five inches); plant bulbs three inches apart in the row. If fertilizer is used at planting time, keep at least two inches from bulb, by covering bulb with dirt before adding the fertilizer.

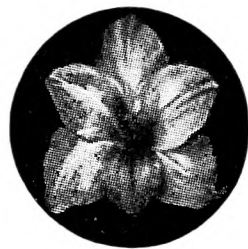

SPRAYING and THRIP—Thrip is a very small insect $1/16$ inch, and the cause of most all gladiolus failures. It causes the plant to turn brown, and does not permit the development of a good flower. While this insect is no longer serious, preventive measures must be used. **Soak all bulbs** before planting, with bichloride of mercury as directed above. Thrip survive the winter in your storage, so take the bulbs to the garden in the container you soaked them in. Everything taken from the storage should be clean. Inspect the plants closely when small, start when they are 2" high—if thrip is detected spray daily until they are destroyed, then spray once a week, or as your case requires. They must all be destroyed before flower spike starts. Spray in the early evening, this gives a minimum of evaporation and permits the spray to spread more thoroughly. The best and most economical spray is Rototox—write them—The Rototox Co., 81 East Yale St., East Williston, N. Y. They will send you pamphlet on how to use Rototox, and prices.

WATER and CULTIVATION—Water thoroughly so that it will soak down to the bulb, at least once a week, but count a good rain as one; cultivate thoroughly next day if not sticky.

THE FLOWER—If you wish to cut the flower do it when the first flower opens wide. To get a nice spike with it, slide the knife down close to spike on one side stopping six to eight inches from ground, then slide it down the opposite side giving knife a twist at the bottom to remove spike with flowers; this operation cuts leaves from spike but they remain on the plant, which is essential to properly mature the bulb.

HARVESTING—Bulbs should be ready to dig three to six weeks after blooming, or dig when foliage starts to turn brown. Loosen bulb with fork or other tool and bulb will lift out by the top—shake dirt off—cut tops off close to bulb, let bulb fall in clean container (three inches deep), pile up tops for burning. Let bulbs cure three to six weeks in a dry, airy, frost-proof place, stir occasionally for thorough drying—they must be dry. When ready, the old root should snap off easily, leaving bulb clean; now store away for winter in containers (boxes or bags) not over four inches deep, in a cool, dry, frost-proof place.
